Forecast for Tuesday 27 Apr 2021

Weather: Cloudy at first with the odd spot of rain, but becoming dry by dawn with cloud lifting and breaking. Scattered showers will develop mid-morning onwards, with the odd heavier shower possible in the afternoon. Dry for a time early evening with some clear spells, however further showers will spread from the northeast late in the evening.

Chance of cloud free mountain/hill tops above 600m: 60% during the early hours with areas of cloud on some slopes above 700m. Improving to 90% or better soon after dawn as cloud lifts and breaks leaving only patches near 800m, mainly in showers.

Visibility: Generally good at low levels during the early hours, but with areas of cloud on some slopes above 700m. Improving to generally excellent soon after dawn with cloud lifting and breaking largely clear of the summits. However there will be some brief deteriorations in showers with patchy cloud lowering to 800m.

Meteorologist's View

A cool feeling day for the end of April, especially on the summits, so consider packing extra layers if you're heading out onto the higher routes.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Wednesday 28 Apr 2021

Weather: Scattered showers during the early hours of Wednesday may merge to give some longer spells of rain both during the morning and afternoon, with the odd heavy burst of rain possible at times. The showers should become less frequent early evening onwards with some clear spells developing.

Maximum wind: East to northeast 20-25 mph occasional gusts 30-35mph.

Chance of cloud free mountain/hill tops above 600m: 30% or less for much of the day, but eventually improving in the evening to 70%.

Visibility: Areas of low cloud will cover many slopes above 500-700m for much of the day, with often moderate visibility at lower levels in rain and showers. Improving to generally good in the evening as the cloud lifts and breaks from the north leaving only occasional patches near 700m.

Temperature: **Valleys:** Plus 4 Celsius becoming plus 9 Celsius.
At 600m: Plus 3 Celsius.
Freezing level: 1100m falling to 800m in the evening.
